

Per-firm bid behaviour, critical vs flat hours

A. Number of bid steps

B. Quarter-to-quarter bid repetition

C. Top of the bid ladder

D. Bottom of the bid ladder

A bid step is one price-quantity pair in a firm's supply offer for a given period; a firm with more steps offers a finer-grained supply curve. 'Identical across quarters' = the firm submitted the exact same step (price and quantity) in all four quarters of the same clock-hour. Sample: combined-cycle gas (CCGT) units operated by the four largest Iberian groups, day-ahead market, October-December 2025 (post-reform window).
